HTML and CSS (with HTML 5)!

Chapter 3 Lab Exercises

1) Create a correct and standard-compliant XHTML basic document structure. Inside the <title> element place the text Lab 3: Lists.

2) Create an <h2> element just below the opening body tag in your script. In between the opening and closing heading tag insert the text "Ten Technology Companies."

3) Create and ordered list that contains the names of the following 10 companies:

   Dell   Apple   HP
   Facebook   Google   Motorola
   LinkedIn   Amazon   StumbleUpon
   Adobe

4) Below the code for the ordered list insert another <h2> element and use the text "US-Based Airlines" as the element text.

5) Create an unordered list and list the names of the following airlines:

   American   United
   US Airways   Delta
   Southwest   Frontier
   jetBlue   Hawaiian Air
   Alaska Air   Virgin America

6) Using the technique demonstrated in class, alter the CSS for the unordered list to use a custom bullet. You may download the bullet used in the video lecture from the class files, or, if you prefer, find your own.
